

Company Profile

Banking and Finance Information Technology (B&F SOFT) is a specialised vendor of IT solutions for the banking and financial community. Established in 1993 by a group of bankers and IT expertise to provide the banking community with a variety of modern and cost effective IT solutions.

B&F Soft has extensive experience in retail and international banking systems. Our activities cover system design, development, marketing, consultation, implementation and systems integration.

The B&F Soft strategy is to build quality, and cost effective banking software solutions, enabling the bank staff to focus on managing their businesses rather than managing software applications.

The B&F Soft product range covers a wide range of retail and wholesale banking services. Our products run in integrated open systems environment for the ultimate scalability, portability and connectivity. Its modular characteristics allow the bank to expand its current solution by simply adding new modules to cover a new business area, and protect the bank's investment in its IT infrastructure.

Each product in the B&F Soft banking IT solutions portfolio has been designed to focus on a specific banking business area, and to provide rich functionality and in depth coverage for the real business of that area.

B&F Soft is committed to ensure that our products are compliant with the international banking standards by continuous products development, enhancements and support.

Customer Base

B&F Soft products and services are used in 15 countries worldwide by over 32 banks and around 200 sites.

Customer Services

B&F Soft is equipped with a highly qualified technical support team and agents to assure excellent services are rendered to customers wherever they are regardless of location or time zone.

International Standards

The design of B&F Soft products has been built on the international standards (e.g. ISO, SWIFT) in defining the data fields and data structures.

Multi-Currency and Multi-Branch

B & F Soft products support Multi-Currency and Dual Currency accounting systems.

B & F Soft products support Multi-Branch operations; each branch can operate as a separate accounting entity, and inter-branch transactions to be reconciled between branches.

B&F Soft products support branch networks either sharing hardware or separate servers. In addition, branches can share the same database or use a separate database.

Multilingual

B&F Soft products are Multi-lingual systems, the user can switch between different languages easily and any new language can be added using the translation kit.

Ease of Use

B&F Soft products are based on Windows graphical user interface, which allows the end user to be familiar with products rapidly and to reduce the implementation time.

Documentation

B&F Soft products' documentation contain hundreds of clear and comprehensive pages of text and are delivered in printed form and as on-line help text, which can be viewed whenever required while using the system.

Multi Links

B&F Soft products support online links to SWIFT, Telex, FAX and Email. They also support online real-time links to market rates and deal capture.

Credit Risk Management

B&F Soft products have online real-time limits control. The bank can monitor the exposure for currency, group of currencies, customers, group of customers.
